

Dog policy canteens

08-03-2023

This document serves as a temporary dog policy until the faculty board implements a faculty wide policy. For questions, you can reach out to olympus@science.ru.nl.

Article 1 General ban

It is not allowed to bring any animals into the canteens. The caretaker will remove the animal from the canteens at the first request.

Article 2 Exemptions

The previous article is not applicable:

1. if the animal is a guide dog; or
2. if the animal is a (emotional) support animal; or
3. if Olympus has given permission.

If the animal is not recognisable as such, the board of Olympus can ask the caretaker of the animal for a written note of a study advisor demonstrating the necessity for bringing said animal.

Article 3 Abandoned animals

If there is a suspicion that an animal is present without a caretaker in the canteens, the board of Olympus will ask around in the said canteen if any present person is a caretaker of the aforementioned animal. If it turns out that the animal is abandoned or at least no caretaker is present and will not return within a reasonable period, Olympus will notify the animal protection services.

Under a reasonable period is not meant: the duration of part of a education activity and the duration of a meeting or talks of different nature.
